SME trade finance is broken.

\$2.5T

global trade-finance
gap: about 10% of
world trade

~40%

of SME trade-finance
applications are
rejected

15.5M

containers (TEUs)
through Jebel Ali in
2024, the demand is
right here

A Dubai trader is owed **AED 500,000** by a creditworthy buyer, and needs to pay her supplier now. Her bank says **no**.

It's not a capital problem. Banks just can't see the SME.

- No audited financials, thin or no credit history.
- Tickets too small: KYC and compliance cost more than the deal earns.
- Labelled "high-risk sector," so the bank issues a blanket no.

Fix the **visibility**, and you can lend where banks won't.

Source: ADB, drivers of trade-finance rejection (documentation, credit history, KYC / AML cost).

Dhow turns the invoice into cash, today.

- 1 Pay your overseas supplier in seconds (USDC → AED).
- 2 Get an instant, explainable credit verdict.
- 3 Financed now; repaid on time; your score rises.

UNDERWRITING VERDICT
Prime · grade A

ADVANCE

88%

FEE

0.8%

PAID

~8s

On AED 500k, she keeps AED 16,900 vs a bank, and the cash lands today.

Three things became true, all in the last 12 months.

01 · STABLECOINS

Regulated AED is live

AE Coin, the first dirham stablecoin, got a full CBUAE licence (Dec 2024). USDC ↔ AED at the edge is now legal.

02 · OPEN FINANCE

Bank data is mandatory

CBUAE Open Finance Regulation, in force 10 Jul 2025: banks *must* share SME cash-flow data. Underwriting in hours, not weeks.

03 · POLYGON

Re-built for payments

Polygon PoS refocused on stablecoin payments and RWA. \$3.57B in payment volume in Q4 2025 alone (+399% YoY).

Fiat lenders can't combine them. The stablecoin card players haven't. **We do.**

We lend on cash flow, not collateral.

A deterministic, **explainable** underwriting engine reads the SME's real money movement (via Open Finance) and on-chain repayment history, and prices every advance with reasons attached.

BLIND (THIN FILE)

Grade D

80% advance · higher fee. The engine stays cautious.

connect real cash flow

WITH CASH FLOW

Grade A

88% advance · sub-1% fee. Bigger, cheaper, instant.

Pay on time → on-chain score rises → cheaper credit next time. **The flywheel compounds.**

Not a mockup. Running on Polygon today.

DEPLOYED & POLYGONSCAN-VERIFIED ↗

4 contracts, live

Invoice registry · financing pool · reputation registry · settlement asset,
all source-verified on Polygon Amoy.

A FULL LOOP, EXECUTED ON-CHAIN

500 → 520

Financed \$80,000 → repaid \$84,616 → the SME's credit score rose,
buyer paid from a different wallet. Real transactions.

Every figure in this deck is **verifiable on-chain**, not a slide-only claim.

Non-custodial by design.

We're the intelligence layer on the bank, **not the bank.**

The UAE is where this has to start.

550,000+

UAE SMEs, 94% of all companies and ~64% of non-oil GDP

4%

of UAE bank lending actually reaches those SMEs

\$40B+

annual UAE remittances. UAE → India alone was \$21.6B in 2024

\$2.5T

the global prize behind the UAE beachhead

Sources: UAE Government / Ministry of Economy · UAE Central Bank · World Bank / Khaleej Times 2024 · ADB 2025.

Two revenue lines. Both compound.

LINE 1 · PAYMENTS

A slice of the spread

Part of the 2-5% banks charge on a cross-border payment, while still far cheaper for the SME.

LINE 2 · CREDIT

Risk-based fee

Origination + servicing spread on cash-flow-underwritten advances: the high-margin layer the data unlocks.

SCALES BY CORRIDOR

Same rail, same engine: UAE → India, Pakistan, Africa. No new licence per corridor.

CAPITAL-LIGHT

Partners hold the balance sheet and the licences. We scale software, not regulatory capital.

IMPROVES WITH DATA

Every repayment sharpens the engine. Marginal cost of the next decision is ~zero.

A BANK, ON A \$100K INVOICE

~\$4,200 · ~3 days

VS

DHOW

risk-priced · seconds

Land with the payment. Expand with credit.

WEDGE → MOAT

The cheap cross-border payment wins the customer and captures cash-flow data. Credit is the margin the data earns. Then payroll, treasury, spend.

LEGAL BY CONSTRUCTION

Dhow is software + underwriting. Every regulated leg (data, payments, USDC ↔ AED, lending) runs through a **licensed partner**. Capital-light, compliant, from DIFC.

Open Finance · Lean / Tarabut

Payments · licensed PSP

USDC ↔ AED · Fuze

Balance sheet · licensed lender

Nobody does the full bundle.

FIAT SME LENDERS

On bank rails, so they can't go stablecoin-native without rebuilding their core.

REAP (→ KRAKEN, \$600M)

Stablecoin corporate cards, Hong Kong / Asia. Not UAE-AED trade finance, not cash-flow SME credit.

DHOW

Stablecoin payments + cash-flow credit + the UAE import/export beachhead. The only one with all three.

Our defensibility compounds: payments → data → better underwriting
→ cheaper credit → stickier customer.

Source: Kraken/Payward acquisition of Reap, up to \$600M (2026).

Most teams pitch a roadmap. **Ours starts from a product that already runs on-chain.**

Three builders. Three layers. **All three are live.**

Kaustubh Pardeshi

FULLSTACK · UI/UX

Owens the **product layer**: the SME cockpit, the app, the design system.

🏆 **17+ hackathon wins**, incl. 1st place, Aptos Global.

github.com/Kaustubh-404

Atharva Waghachoure

SMART CONTRACT DEV

Owens the **on-chain layer**: the contracts deployed and verified on Polygon.

🏆 **12+ wins** across Web3 privacy & DeFi.

github.com/AtharvaWaghchoure

Laxmi Khengare

AI ENGINEER

Owens the **credit engine**: the underwriting brain that prices every advance.

🏆 **3+ wins** in the AI + Web3 space.

github.com/laxmikhengare

32+ hackathon wins between us. Two years shipping Web3 + AI. Hunting for the one product the market actually needs. We wrote Dhow's contracts, credit engine and app ourselves, and it is **already running on Polygon**.

Gap we're closing: a UAE regulatory & BD lead. It's exactly why we're built on licensed partners, and what we want from the DIFC network.

The infrastructure is ready. The market is waiting.

Dhow: cross-border trade finance for the SMEs banks won't bank.
Built on Polygon, launched from DIFC. Non-custodial, cash-flow-
underwritten, live today.
